

Arctic-Antarctic 2001 Project

To: Chancellor Marshall Lind
From: John D. Craven, Chair
UAF Master Planning Committee
Date: February 17, 2000
Subject: Arctic-Antarctic 2001 Project

On February 3, 2000 the Master Planning Committee received a formal introduction to the Arctic-Antarctic 2001 Project by UAF Vice Chancellor Williams, including a written general description of the project and technical information on the proposed structure. Bi ^,d Q ¾â ^,%á š!ô! ABD ô Re• Q !uN*"©µ specifications and supporting data that have been provided to date. Overall, it appears that there is inadequate information with which to determine the feasibility and advisability of siting the structure at UAF. This includes issue of mechanical design, utilities (water, sewer, electricity, steam, etc.), and

The shape of the building has raised questions of compatibility with existing buildings and the design for the museum addition. We do not support a close visual connection between this building and the signature building design for the museum, so we specifically exclude from consideration the space directly north of
